HOW TO MEASURE:

WAIST

Measurement is taken at the top of the hipbone over shirt (not over pants). Tape should be held snug not tight.

SEAT

Measurement is taken around the widest part of your butt and the front of your crotch.

THIGH

Wrap the tape around the widest part of your upper thigh.

INSEAM

Measurement is taken from base of the crotch to top of the shoe or boot.

TORSO LENGTH

(Total Vertical) — Measure the circumference taken from a point on the right shoulder midway between the neck base and the shoulder joint, down the back through the crotch and up over the prominence of the right chest to the starting point, avoiding constriction at the crotch.
